Project Title: Death by Coconut

For my microsite, I want it to be a fun interactive site where people can learn about something that seems absurd. Death caused by coconuts is not something that seems concerning, but there is surprisingly a long list of deaths. I want this website to be multi-pages that go on a deep dive into the rich history of death caused by coconuts. Each page will focus on a specific aspect of coconuts being a disturbance to human society.
